Professional Summary

Fresh Graduate in Computer Science (GPA 3.68/4.00) and AI Engineer Intern building LLM-powered document assistants and workflow automation with n8n, FastAPI, and PostgreSQL. Hands-on with machine learning, RAG with vector databases (ChromaDB, pgvector), prompt engineering, RESTful APIs, Docker, and Git. Backed by one peer-reviewed publication and a university research grant. Eager to support the development of reliable, human-supervised AI products.

Education

Universitas Contoh Nusantara — Surakarta, Indonesia
Bachelor of Computer Science — GPA: 3.68 / 4.00 — *Aug 2021 – Jul 2025*

- **Thesis:** *Sentiment Classification of Indonesian Product Reviews Using Transformer Embeddings and a CNN Classifier* — Built an NLP pipeline on 8,000 product reviews and reduced class imbalance with a modified oversampling method, achieving macro F1-score 0.61.

Experience

AI Engineer Intern — Surakarta, Indonesia
PT Contoh Digital Nusantara — *Aug 2026 – Present*

- Built a retrieval-augmented question-answering service over internal PDF documents using FastAPI, ChromaDB, and an LLM API, with page-level source citation in every answer.
- Designed an n8n workflow that routes incoming chat messages to the relevant tool set before they reach the LLM agent, with a fallback path when the classifier is uncertain.
- Validated all LLM outputs against a Pydantic schema and added an evaluation script that compares extracted fields with hand-labeled examples.

Cloud Computing Bootcamp Graduate — Remote
Contoh Tech Academy — *Jun 2025 – Aug 2025*

- Provisioned and managed core AWS infrastructure (EC2, S3, RDS, VPC, IAM, CloudWatch) across hands-on labs simulating real-world deployment scenarios.
- Applied Linux administration, networking fundamentals, and Python scripting to automate system provisioning.

Web Programming Laboratory Teaching Assistant — Surakarta, Indonesia
Universitas Contoh Nusantara — *Mar 2024 – Jun 2024*

- Mentored approximately 50 students in full-stack web programming through structured, hands-on lab sessions.

Machine Learning Intern — Remote
Contoh Tech Academy (Independent Study Program) — *Aug 2023 – Jan 2024*

- Completed a 600+ hour Machine Learning curriculum covering supervised and unsupervised learning and TensorFlow-based NLP, with a 88.50% average academic score.
- Built and deployed machine learning models using TensorFlow, NumPy, and scikit-learn, including model development, evaluation, and web deployment.

Technical Skills

- **LLM & Generative AI:** Gemini, Llama (Ollama), Prompt Engineering, RAG, LangChain, ChromaDB, pgvector, Embeddings, Semantic Search
- **Automation:** n8n (workflows, webhooks, HTTP/REST integration), LLM Agent Tool Routing
- **Machine Learning:** TensorFlow, PyTorch, Scikit-learn, NLP, CNN, SVM, Model Evaluation (Accuracy, F1, ROC-AUC)
- **Programming & API:** Python (NumPy, pandas, FastAPI, Pydantic), JavaScript, SQL (PostgreSQL, MySQL), RESTful API
- **Deployment & Tools:** Docker, Git/GitHub, AWS (EC2, S3, RDS, VPC, IAM), Linux

Research & Publications

Hyperparameter Tuning for Commodity Price Prediction with Ridge Regression
Jurnal Contoh Informatika — 2025

- Predicted commodity prices using Ridge Regression with grid search and MinMax scaling, achieving the best RMSE of 14.21.

ACHIEVEMENTS

University Research Grant 2025
Student Research Program — Universitas Contoh Nusantara

- Awarded funding for a research proposal on a plant recommendation model based on SVM and metaheuristic optimization.

SELECTED PROJECTS

Multimodal RAG System for Document Q&A *2026*

- Built an end-to-end RAG system for querying long PDF reports with text, tables, and charts using a vision-capable LLM, LangChain, and ChromaDB.
- Designed a FastAPI backend with `/ingest` and `/query` endpoints and overlap-aware text chunking.

Spice Classification System *2024*

- Compared Random Forest, Random Forest with grid search, and Random Forest with Particle Swarm Optimization on an image classification task for three similar-looking spices; the best model reached 88.40% accuracy.

CERTIFICATIONS

- **TensorFlow Developer Certificate** — Example Certification Body (2024)
- **Machine Learning Specialization** — Example Online Learning Platform (2023)
